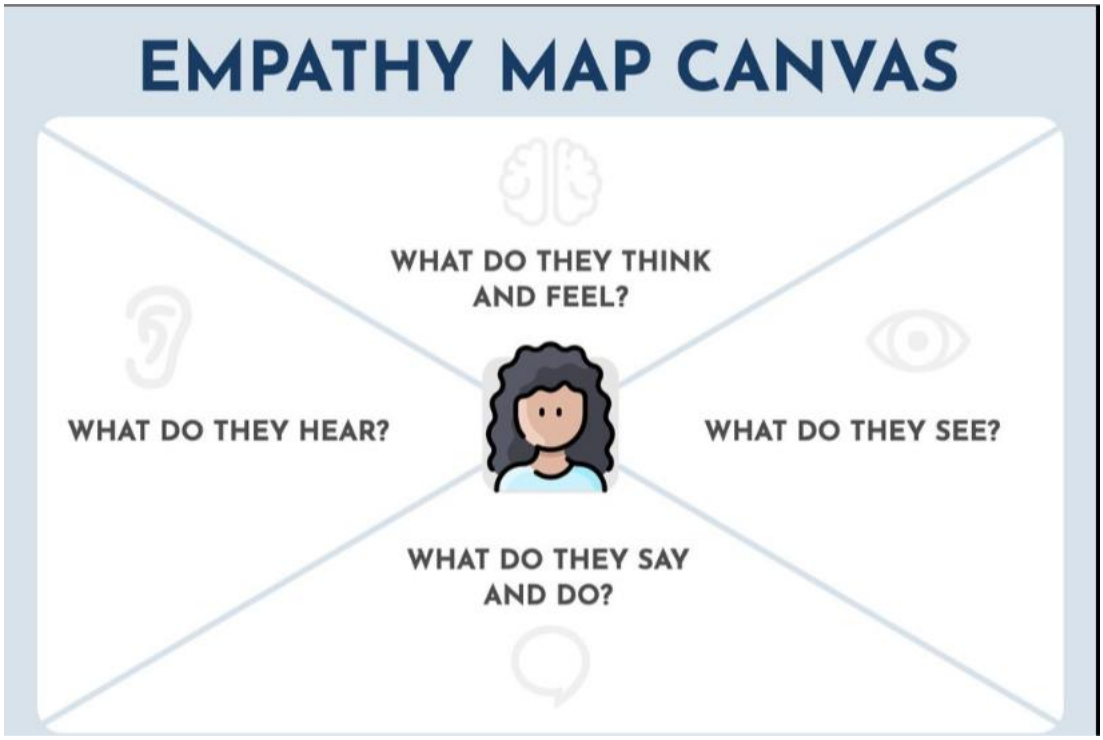
IDEATION PHASE

Empathize & discover:

An Empathy Map Canvas helps understand users' thoughts, feelings, and actions when working with a system.

It is a useful tool to helps teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. the exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

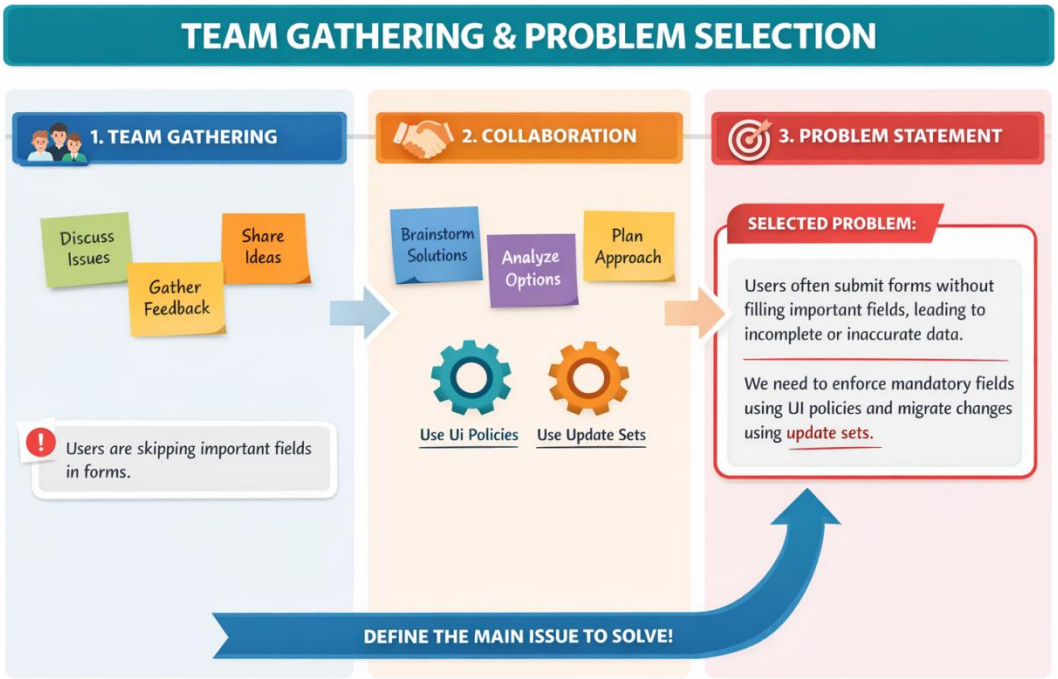


EMPATHY MAP CANVAS
WHAT DO THEY THINK AND FEEL?
WHAT DO THEY HEAR?
WHAT DO THEY SEE?
WHAT DO THEY SAY AND DO?

Brainstorm & idea prioritization template:

Brainstorming provides a fress and open environment that encourages everyone within a team to participate in a creating thinking process that leads to problem solving.

Prioritizing volume over value, out-of-the-box ideas are welcome and built upons, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solution.



TEAM GATHERING & PROBLEM SELECTION
1. TEAM GATHERING
Discuss Issues
Share Ideas
Gather Feedback
Users are skipping important fields in forms.
2. COLLABORATION
Brainstorm Solutions
Analyze Options
Plan Approach
Use Ui Policies
Use Update Sets
3. PROBLEM STATEMENT
SELECTED PROBLEM:
Users often submit forms without filling important fields, leading to incomplete or inaccurate data.
We need to enforce mandatory fields using UI policies and migrate changes using update sets.
DEFINE THE MAIN ISSUE TO SOLVE!

Define the problem statement:

Customer face issues when trying to delete users who are still assigned to active incidents. This leads to broken workflow and incomplete incident tracking.it creates confusion among team members who rely on accurate assignments records. delays in incident resolution can also impact service quality and compiliance.

PROBLEM & SOLUTION TABLE

PROBLEM	DESCRIPTION	SOLUTION
PROBLEM	**DESCRIPTION**	**SOLUTION**
Users skip important fields in forms	Some users submit forms without entering required information.	**Use UI Policies** to make important fields mandatory
Incomplete data in the database	Missing data affects request processing and reporting.	Enforce mandatory fields and validation rules
Inconsistent form behavior	Different forms may have different field requirements.	Standardize **UI Policies** across forms
Difficulty migrating configuration changes	Changes made in development may not reach the production instance.	Use **Update Sets** to capture and move configuration changes
Risk of missing changes during migration	Some configurations may not be transferred correctly.	Review and test **Update Sets** before committing.
